CLUCO.AI — ATS Automation Status Report

Master Technical Evaluation Matrix for Engineering Leadership

Master Status Matrix

All 8 Platforms • 1 Single Table

8	4 (50%)	4 (50%)	100% (8/8)
PLATFORMS EVALUATED	COMPLETED & READY	FACING ISSUES	FORM EXTRACTION RATE

All 8 ATS Platforms — Status & Technical Problem Matrix

Sorted by Operational Readiness

ATS PLATFORM	CURRENT STATUS	CORE PROBLEM / BOTTLENECK ENCOUNTERED	RESOLUTION / TECHNICAL ACTION PLAN
1. SmartRecruiters Enterprise Global ATS	✅ Completed (100%)	None (Clean Flow): Zero bot blockers. Multi-language questions, resume parsing, consent checks pass cleanly.	Production Ready: Currently submitting live applications in production end-to-end.
2. Oracle Cloud CX Fusion Recruiting	✅ Completed (100%)	None (Solved): Handled email verification gateway, legal disclaimers, and multi-section (1–3) auto-filling.	Production Ready: Dynamic work experience card expansion and contact auto-filling verified.
3. Taleo (Oracle) Business Edition / v2	✅ Completed (100%)	None (Solved): Multi-step tab navigation, automated credential creation, resume file attachment verified.	Production Ready: Final review e-signature and submission execute with 100% success.
4. Workable Modern Mid-Market ATS	✅ Completed (100%)	None (Solved): Single-page extraction, automated screening question answers, resume upload pass cleanly.	Production Ready: Post-submit Cloudflare Turnstile handled gracefully via human mouse.
5. Workday Enterprise Fortune 500	⚠️ Facing Issues	**Tenant Login & Auth Gate:** Mandates separate candidate account per company tenant; gets stuck on Sign-In/Sign-Up modals and session timeouts before form entry.	Implement tenant-aware auto-registration handler, persistent session cookies per company, and automated sign-in recovery.
6. Ashby Tech Job Board ATS	⚠️ Facing Issues	**reCAPTCHA Enterprise / Rate Limit:** Scores session <0.5 without mouse trajectories, blocking POST with "*possible spam*". 3-app/60-day company limit.	Implement Cubic Bézier human mouse curves + persistent Google-authenticated browser context + residential IP proxy.
7. Greenhouse Tech Market Leader	⚠️ Facing Issues	**React State Desync & Turnstile:** `react-select` dropdowns drop state causing "*This field is required*"; Turnstile token check and 8-char email OTP prompt.	Scoped `aria-controls` synthetic event bubbling for dropdowns + 2s Turnstile bottom dwell + automated email OTP listener.
8. Lever Tech Startup ATS	⚠️ Facing Issues	**Interactive hCaptcha Modal:** Submit trigger halts on visual puzzle challenge (*"Select images with buses"*), timing out headless runs (90s). Location JSON binding.	Inject verified tokens via automated CAPTCHA solver service (CapSolver API) + enforce strict Typeahead location suggestion selection.

📌 Executive Recommendation & Sprint Focus

Live Scaling (4 Platforms): SmartRecruiters, Oracle Cloud CX, Taleo, and Workable are 100% production-ready and active today.
Remediation Sprint (4 Platforms): Focus engineering effort on **Workday's Auth/Login Gateway**, the **Bézier Human Mouse Engine (Ashby/Greenhouse)**, and **Automated CAPTCHA Solvers (Lever)** to achieve >90% unblocked submission across all 8 ATS.
