OBJECTIVE

A curious and solution-oriented Computer Science Engineering student having keen interest in building AI-powered and scalable web applications. Able to find solutions, program, and learn new technologies quickly. Motivated to leverage technical expertise, design intelligent software solutions and participate in innovative projects, while steadily maturing my development and analytical skill set.

TECHNICAL SKILLS

Programming Languages: Python, Java

Databases: MySQL

Tools: Git, GitHub, VS Code, MS Office

Frameworks: Flask

Soft Skills: Team Collaboration, Communication, Leadership, Critical Thinking

EDUCATION

B.Tech - CSE(Core), Parul University, Vadodara (2023 - 2027), CGPA: Current (7.00)

Intermediate - MPC, Sri Shridi Sai Collage, Rajamundry (2021 - 2023), Percentage: 68.8%

Secondary Education 10th, Narayana Olympiad, Rajamundry (2019 - 2020), Percentage: 68.8%

INTERNSHIP EXPERIENCE

AIML Intern - Infosys (Dec-2025 - Feb-2026)

Completed an AI and Machine Learning internship through the Infosys learning platform. Gained practical experience with machine learning concepts, data preprocessing, and model building. Developed an understanding of AI applications, analytical thinking, and problem-solving methods used to create smart systems.

PROJECTS

HireGrade – AI Job Portal (Python, AI, UI/UX)

- Developed an AI-powered job portal that analyzes resumes and identifies skill gaps based on industry requirements.

- Implemented intelligent resume parsing and career recommendation features to guide users toward suitable job roles.

- Designed a skill gap severity analysis system to provide AI-based feedback for improving employability.

- Built an interactive platform that helps job seekers understand market demands and plan their career growth.

Email Classifier – Machine Learning Project (Python, ML Libraries, UI/UX)

- Developed a machine learning-based email classification system to automatically categorize emails such as spam and important messages.

- Implemented text preprocessing techniques including tokenization, stop-word removal, and feature extraction.

- Applied machine learning algorithms to improve classification accuracy and automate email filtering.

Toycathon Hackathon – Online Learning Game for Children (Python, Flask, UI/UX)

- Participated in a college-level Toycathon hackathon focused on creating innovative educational toy concepts.

- Developed an interactive online learning game for children aged 2–8 to support early education through fun activities.

- Built the backend using Python and Flask and designed a child-friendly interface for better engagement.

SmartCrop – Smart India Hackathon (Python, Data Analysis, UI/UX)

- Developed a smart agriculture solution to help farmers select suitable crops based on soil conditions and environmental factors.

- Utilized data analysis techniques to recommend crops that improve productivity and sustainability.

- Designed an intuitive interface to provide technology-driven insights for farmers.

ACHIEVEMENTS & CERTIFICATES

- Infosys SpringBoard Internship Certificate (AI & Machine Learning)

- Python Course - Kaggle

- Selected as a participant in Smart India Hackathon (SIH), collaborating to develop SmartCrop solution.
