SUMMARY

Computer Science student specializing in Artificial Intelligence with hands-on experience building full-stack MERN applications. Skilled in React.js, Node.js, and real-time systems. Experienced in developing collaborative platforms and deploying applications using modern tools like Vercel and Render.

EDUCATION

Parul University, Vadodara, Gujarat (Expected: May 2027)

Bachelor of Science in Computer Science (Artificial Intelligence)

TECHNICAL SKILLS

Languages: JavaScript, Python, Java

Frameworks & Libraries: React.js, Node.js, Express.js, WebSockets, Socket.io

Databases: MongoDB, MySQL

Cloud: AWS (EC2, S3, Lambda, IAM, CloudWatch)

Version Control: Git, GitHub

Tools: Vercel, Render, GitHub Copilot

PROJECTS

Oxford School Fee Management System

- Built full-stack web app for Oxford School with role-based auth: Staff and Admin logins with JWT, handling 2-tier access control.

- Designed modules for Student Info, Course/Books/Transport fee collection, Fee History, and Pending Fee tracking for Nursery to Class 10.

- Implemented payment flow with multiple modes: Cash, QR, Bank, Card; auto-generates printable receipts and updates pending balances in real time. Developed reporting dashboard showing daily, weekly, and monthly income with day/week/month filters to help admin reconcile collections.

- CRUD operations. Enabled Staff to add/edit student records and Admin to manage fee structures; added search & filter across classes to quickly access student profiles.

CERTIFICATIONS

- Technology Job Simulation at Deloitte (Forage), April 2026

- Generative AI for All by Infosys Springboard
