SUMMARY

Full-Stack Developer and AI Engineer with hands-on experience building scalable AI-powered applications using Python, Java, FastAPI, React, REST APIs, and modern cloud infrastructure. Strong expertise in RAG systems, NLP, OpenAI APIs, local LLMs, backend architecture, and full-stack development. Experienced in deploying production-ready applications using Docker, Azure App Service, Azure Blob Storage, and modern DevOps workflows. Passionate about building intelligent software products that solve real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript

Frameworks & Libraries: FastAPI, Flask, React, Tailwind CSS, REST APIs

Databases & Backend: MySQL, MongoDB, Supabase, Backend Architecture, API Development

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, System Design

DevOps & Cloud: Docker, Azure App Service, Azure Blob Storage, Git, GitHub

AI / ML: NLP, RAG, FAISS, OpenAI APIs, Local LLMs, OpenCV

Tools: Figma, VS Code, Claude, Anti-Gravity, Codex

WORK EXPERIENCE

Full Stack AI Developer | Jobspring (Jan 2024 – Jan 2026)

- Built an AI-powered resume generation platform using OpenAI APIs, generating 50+ customized resumes for users.

- Designed and implemented scalable FastAPI backend services and React frontend workflows for multi-user applications.

- Reduced API response latency by 30% through database query optimization and backend performance improvements.

- Containerized and deployed applications using Docker and Azure App Service, reducing deployment time by 60%.

Full Stack Developer (Freelance) | Nomadic Trails (Sept 2025)

- Delivered full-stack features for a travel-tech platform serving customer-facing applications.

- Built scalable backend APIs and responsive frontend interfaces using modern development practices.

- Integrated third-party APIs for itinerary generation and workflow automation.

PROJECTS

LocalMind OS (Live Demo)

- Built an offline AI workspace for querying PDFs, notes, chat exports, and code repositories using local LLMs.

- Developed a RAG pipeline using FAISS vector search and semantic retrieval for intelligent document querying.

- Implemented document ingestion, chunking, embedding generation, and retrieval workflows.

- Designed FastAPI backend services for indexing, summarization, and conversational AI capabilities.

JobSpring – AI-Powered Career Platform (Live Demo)

- Engineered an AI-powered career platform offering resume building, interview preparation, and application optimization tools.

- Orchestrated ATS-friendly resume generation workflows with personalized recommendations based on job descriptions.

- Integrated AI-driven interview coaching systems that provide real-time feedback and placement readiness support.

SkillSense AI (Live Demo)

- Architected an AI-powered platform for technical skill assessment and placement readiness evaluation.

- Developed automated analysis pipelines for resumes, GitHub repositories, and coding profiles.

- Designed candidate scoring workflows using NLP and OpenAI APIs.

ACHIEVEMENTS & LEADERSHIP

- SSIP Startup Funding Recipient – Awarded 1 Lakh startup funding support.

- Smart India Hackathon 2024 – University Finalist.

- HackVerse 2025 – Top 5 Finalist.

- Senior Head, CodeX Fusion Coding Community – Mentored 300+ students in AI, Data Structures & Algorithms.

EDUCATION

B.Tech, Computer Science Engineering (AI & ML) | Parul University – CGPA: 7.1 / 10 (Expected 2027)
