SUMMARY

Full-Stack Developer and AI Engineer with hands-on experience building scalable AI-powered applications using Python, Java, FastAPI, React, REST APIs, and modern cloud infrastructure. Strong expertise in RAG systems, NLP, OpenAI APIs, local LLMs, backend architecture, and full-stack development. Experienced in deploying production-ready applications using Docker, Azure App Service, Azure Blob Storage, and modern DevOps workflows. Passionate about building intelligent software products that solve real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript

Frameworks & Libraries: FastAPI, Flask, React, Node.js, Next.js, Tailwind CSS, REST APIs

Databases & Backend: PostgreSQL, MySQL, MongoDB, Supabase, Backend Architecture, System Design

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, System Architecture

DevOps & Cloud: Docker, Azure App Service, Azure Blob Storage, AWS, Git, GitHub, CI/CD

AI / ML: NLP, RAG, FAISS, OpenAI APIs, LangChain, Local LLMs, Vector Databases

Tools: VS Code, Linux, Docker Desktop, Postman

WORK EXPERIENCE

Full Stack AI Developer | Jobspring (Jan 2024 – Present)

- Engineered an AI-powered resume and career optimization platform using OpenAI APIs, serving 500+ active users.

- Designed and implemented scalable FastAPI backend microservices and responsive React workflows.

- Reduced API query response latency by 35% through Redis caching and query indexing optimization.

- Containerized and deployed services using Docker and Azure App Service, streamlining release pipelines.

Full Stack Developer (Freelance) | Nomadic Trails (Sept 2024 – Dec 2024)

- Built interactive frontend dashboards and scalable REST APIs for customer-facing applications.

- Integrated third-party mapping and payment gateways, maintaining 99.9% uptime.

- Developed modular React components and backend services in TypeScript and Node.js.

PROJECTS

LocalMind OS

- Built an offline AI workspace for querying PDFs, repositories, and documentation using local LLMs.

- Implemented a RAG pipeline utilizing FAISS vector similarity search and semantic document retrieval.

- Developed FastAPI backend services for text chunking, embedding generation, and contextual retrieval.

JobSpring – Career AI Engine

- Created an end-to-end ATS matching engine evaluating resumes against job descriptions with real-time feedback.

- Integrated LLM screening interview simulators and automated technical evaluation benchmarks.

EDUCATION

B.Tech, Computer Science Engineering (AI & ML) | Parul University (CGPA: 8.2 / 10)
